Greetings,

My name is Guillermo Rodriguez and I am very excited over this position. In college I received my B.A. in Multi Media Arts and graduated with honors. Currently I am the graphics specialist for Familia Indigena Unida. My duties include coordinating workshops, videography, presentations, graphic design and web design. www.familiaindigenaunida.org

Previously I have had the opportunity to work with the broadcast team on video production projects for a school. I worked on scene backgrounds, logos, shirt designs, and even intro animations. I also did illustrations for the yearbook and worked on the schools web site. At one point I taught basic art to teens through 6 to 6 an after school program. I have worked on different kinds of projects ranging from 6 foot vending machine art work to e-commerce web sites. Including banners and promotional materials and ad campaigns and photography manipulation.

In addition I have done Video editing, compositing in 2d and 3d Animation and green screen effects. I am familiar with pre-production, production and post production. I consider myself a generalist graphic multimedia designer. I keep up with the latest software and technical knowledge. In addition I enjoy the entire creative process from concept drawings to final renderings, which has helped me in my foundation for organized storyboards. I am looking for an opportunity to grow as a multimedia artist by taking on new challenges. I'm interested in a career in graphic design where my formation in art and graphic design would contribute greatly to the goals of the company.

I would appreciate meeting in person to discuss the position of Website Designer/Graphic Artist. I will adjust my schedule to meet yours.

What time and date work best for you? I welcome the opportunity for a personal interview.

Sincerely, Guillermo Rodriguez

Guillermo Rodriguez
